 Bengaluru, India

SUMMARY

Frontend Developer with 4+ years of experience building scalable Angular applications and hybrid mobile solutions. Delivered 9+ production applications used by 50K+ users with strong focus on performance optimization, reusable components, and REST API integration. Experienced in Angular, TypeScript, RxJS, NgRx, and REST API integration, with exposure to Node.js backend development and Agile practices.

CORE COMPETENCIES

Angular Development • Frontend Architecture • Component Based Development • RxJS Reactive Programming • NgRx State Management • REST API Integration • Responsive UI Development • Performance Optimization • Cross Browser Compatibility • Hybrid Mobile Development • Agile Development Practices

SKILLS

Angular (v8–v17+)

Angular Material

Ionic Framework

TypeScript

JavaScript ES6+

HTML5

CSS3

Bootstrap 5

Responsive Web Design

Cross Browser Compatibility

RxJS

NgRx

State Management

RESTful API Integration

Node.js

Express.js

PostgreSQL

Firebase Integration

Push Notifications

Google Maps Integration

Cordova

Capacitor

Lazy Loading Modules

Component Based Architecture

Performance Optimization

Git

Agile / Scrum

Code Reviews

Debugging

EXPERIENCE

Jun 2022 – Present
Bengaluru, India

Software Engineer – Angular Developer

Bigcity Promotions

- Developed scalable enterprise frontend applications using Angular, TypeScript, HTML5, CSS3, Bootstrap, and Ionic Framework.
- Architected modular component-based application structures improving maintainability and scalability.
- Developed and integrated 20+ reusable UI components, thereby decreasing development time for new features.
- Improved application performance by 30% through lazy loading, optimized REST API communication, and efficient rendering.
- Developed RESTful APIs using Node.js and Express.js to support frontend Angular applications.
- Collaborated in Agile development environments using Zoho Sprints for sprint planning and task tracking.
- Maintained an average of 90% sprint completion rate by defining user stories, prioritizing tasks, and tracking progress using Zoho Sprints.
- Implemented reactive state management using RxJS and NgRx to maintain predictable application state.
- Delivered 9+ production applications serving 50K+ users across loyalty and engagement platforms.
- Developed configurable admin dashboards for managing users, campaigns, rewards, targets, and engagement workflows.
- Integrated QR scanning, OCR data extraction, push notifications, and OTP authentication using Capacitor plugins.
- Maintained high code quality through Git workflows, debugging, and peer code reviews.
- Mentored junior developers and supported Agile development processes.

KEY PROJECTS

Enterprise Angular web and hybrid mobile applications developed for loyalty and engagement platforms serving 50K+ users.

Carlsberg Bandhan

- Developed enterprise loyalty mobile platform using Angular and Ionic.
- Implemented QR scanning and OCR workflows for automated product validation.
- Built admin dashboard for campaign configuration and reward management.
- Optimized application performance using lazy loading and efficient API communication.

Bud4Trade

- Developed trade engagement application enabling partners to track schemes, rewards, and performance.
- Implemented modules for reward redemption and engagement campaigns.
- Designed scalable UI components ensuring cross-device compatibility.

Greenply Samet Super Stars Club

- Developed loyalty rewards platform enabling carpenters to earn and redeem reward points.
- Implemented authentication, reward tracking, and purchase validation workflows.
- Built reward redemption modules including e-vouchers and merchandise rewards.

Wipro Urja

- Developed mobile application and admin panel for engagement and reward management programs.
- Implemented QR scanning functionality for product validation and point earning.
- Built refer-and-earn and quiz engagement modules.
- Implemented OTP authentication and cashback redemption workflows.

EDUCATION

Bachelor of Technology – Electronics & Communication Engineering Yogi Vemana University (2017 – 2021)

ACHIEVEMENTS

- Above & Beyond Award – 2024 for delivering high-quality production applications.
- Hackathon Runner-Up – 2025 for building scalable frontend solutions under tight deadlines.
